A GUIDE TO TONERS

Here are our 8 picks for products that will change your skin—for the better.

Toner; it's the oft-forgotten step in a daily beauty routine, yet when properly applied it can maximize the skin's ability to absorb product efficiently (moist skin absorbs topical products better than dry). For best results apply toner after the cleansing the face to help remove any excess oil and dead skin that you may have missed while washing. Keep looking through the *DuJour* gallery for the lowdown on the best toners on the market for every skin type and concern, from formulations with glycolics that target acne to anti-oxidants or moisturizing vitamin E.
