INTERVIEW: JAMIE ROSEN

BEAUTY DIRECTOR
TOWN & COUNTRY MAGAZINE

Welcome to #CharlotteTalksTo, where we feature amazing women out there shaking things up and remaining fabulous in the process. How do they do it? Behind every beautiful and brilliant woman are a few secrets that help them “be timeless”.

ON DAILY BEAUTY ROUTINE:

Biologique Recherche P50. I am pretty religious about this one, which is a beauty editor favorite, and probably the product I talk about the most because it's the one thing I never change in my routine. It's a lactic acid toner that keeps your skin clear and gently exfoliates. The facialists I love (Melanie Simon, Nicole Paxson, Terri Lawton, the list goes on...) are devoted to it. And one of them talked to me about how grateful she was to have it in her life. It feels like an extreme thing to say about a bottle of liquid, but a good beauty product should do that—make you feel good, give you a little extra boost.
