Glamorous Looks for Evening

Party 'Til You Drop

Biologique Recherche's two face products are must-haves for keeping your makeup in place *all* night. *P50*, also known as the "facial in a bottle," prepares skin by exfoliating and toning. This amazing vitamin-enriched exfoliating potion gently purifies, hydrates, tones, controls sebum and balances the skin, visibly improving many common skin conditions. It also prevents and treats ingrown hairs, making the product ideal for pre- and post-shaving care! *VIP O²*, an oxygenating fluid, protects skin from external pollutants and serves to give skin a lighter, brighter complexion either alone or under makeup to create a soft, flawless finish. Both are used and sold in exclusive spas and medical practices worldwide. For more info, visit www.biologique-recherche.com or call 1-800-755-5270.
