FREEDOM OF CHOICE

A culture of individuality reigns at Schloss Elmau, Germany

Treatment focus

Anti-ageing in high definition

Natura Bissé has launched a new anti-ageing ritual that provides an alternative to cosmetic micro-injections.

Inhibit High Definition Treatment incorporates the popular Inhibit High Definition Serum, an intensive correcting serum for expression lines. This formula has been enhanced with a new neuropeptide relaxer, conotoxin, which works directly on the formation of expression lines and wrinkles, doubling the effectiveness of the product.

The protocol also features Inhibit High Definition Patches, trans-epidermal correcting patches that feature an exclusive combination of active anti-wrinkle ingredients including double hyaluronic acid and conotoxin.

With no invasive procedures, this unique combination applied at home promises to smooth, fill, lift and firm, revealing high definition skin in just four weeks.

It's all in the eyes

Designed to reduce the signs of ageing and fatigue in the delicate eye contour area, Biologique Recherche has launched Patches Défatigants.

The patches are made from natural biocellulose fibres, pre-soaked in an active formula that includes dipeptides and caffeine to reduce puffiness; hyaluronic acid to boost hydration; matrikines and flavonoid to fight under-eye bags; and silk tree extract, cassava extract and fucose-rich polysaccharides to smooth wrinkles.

Applied to the upper and lower areas of the eye the 'tweezer-like' shape enables optimum application for long-lasting, visible results.

A star is born

Mii Cosmetics has launched a bold new collection of statement colours for the coming seasons. Supernova combines the best for eyes and lips with ready-to-wear shades for everyday and eye-popping eyeliners for the party season.

Power Matte Lip Crème is a feather-light, long-wearing matte infused with sweet almond and jojoba oils, which introduces four shades: Eternity, Imperial, Sensuous and Supreme.

Showstopping Eyeliner is a black statement jumbo liner with fast-drying pigments and long-lasting results. Finally, for a bold, party look Glitter Glam Liner is infused with iridescent sparkle and can illuminate a dark liner in an instant.
