Biologique Recherche

Biologique Recherche's Huile Bénédicte contains a treasure trove of botanical oils and flower and plant extracts to keep skin healthy. Botanical oils like sunflower seed and apricot kernel oil nourish the skin, maintain moisture levels, and restore suppleness. Sesame seed and coconut oil maintain the epidermis and prevent dehydration.

Flower extracts such as frangipani and tiaré flower extracts restore softness, while plant extracts rich in Carotenoids, (including carrot, tomato, and annatto extracts) help even skin tone. Huile Bénédicte's non-greasy formula delivers a protective film to the skin's surface, leaving it radiant and healthy. 212-989-6077, www.biologique-recherche.com
