## NEW PRODUCTS

### SENSITIVE EYE CONTOUR AREA

According to company product information, Biologique Recherche's newly introduced Crème Contour des Yeux Biosensible contains active ingredients — including its proprietary Specific Biologique Recherche Oxygenating Complex — to help protect and soothe the sensitive skin around the eyes and diminish dark circles with a formula that combines ingredients that effectively treat the hyper-sensitive, weakened skin in the eye contour area without irritation.

The ophthalmologically and dermatologically tested Crème Contour des Yeux Biosensible is hypoallergenic and contains no artificial fragrance or other irritants. The formula is quickly absorbed and does not leave a greasy film.
